Published bi-monthly by Pergamon Press

HONORARY EDITORIAL ADVISORY BOARD

R. A. BROOKER (*Manchester*)
L. FOX (*Oxford*)
D. C. GILLES (*Glasgow*)
A. S. HOUSEHOLDER (*Oak Ridge*)
G. F. J. TEMPLE (*Oxford*)
A. THOM (*Oxford*)
J. H. WILKINSON (*N.P.L., Teddington*)

SCIENTIFIC TRANSLATION EDITOR:
R. C. GLASS, M.A., M.Sc.,
The City University, London

Translators: D. E. BROWN, W. CHRZCZONOWICZ, E. L. SHORT and H. ZAHAVI

Publishing and Advertising Office:
Pergamon Press Ltd., Headington Hill Hall, Oxford, OX3 0BW

Subscription Rates
1986 *Subscription rate* $625.00 (*including postage and insurance*)
Two year rate (1986/1987) $1187.50
Subscriptions are only serviced after payment has been received and are not accepted for less than one year. Prices are subject to change without notice.

Subscription enquiries from customers in America should be sent to:
Pergamon Press Inc., Maxwell House, Fairview Park, Elmsford, NY 10523, *U.S.A.,*
and for the remainder of the world to:
*Pergamon Press Ltd., Headington Hill Hall, Oxford OX*3 0*BW, U.K.*

Microform Subscriptions and Back Issues
Back issues of all previously published volumes are availabe in the regular editions and on microfilm and microfiche.
Current subscriptions are available on microfiche simultaneously with the paper edition and on microfilm on completion of the annual index at the end of the subscription year.

VOLUME CONTENTS

VOL. 24, NO. 1 CONTENTS 1984

Translation of Number 1

A. A. Abramov, A. L. Dyshko, N. B. Konyukhova, T. V. Pak and B. S. Pariiskii — 1 — Evaluation of prolate spheroidal function by solving the corresponding differential equations

L. S. Klabukova and I. I. Chechel' — 11 — Solution of boundary value problems of the theory of generalized analytic functions by a variational difference method

E. N. Gordeev and V. K. Leont'ev — 22 — Parametric trajectory problems

E. I. Bykova — 28 — Projection-difference schemes with a splitting operator for parabolic equations with singularities in the coefficients

B. N. Khoromskii — 32 — An integro-difference method of solving the Dirichlet problem for Laplace's equation

O. M. Belotserkovskii, A. I. Panarin and V. V. Shchennikov — 40 — A method of parametric correction of difference schemes

V. I. Gryn' — 46 — On variational principles for the transport equation and their connections with the P_N-approximation of the method of spherical harmonics

A. A. Ioltukhovskii, I. V. Mishin and T. A. Sushkevich — 57 — Solution of the transport equation in a three-dimensionally inhomogeneous scattering layer by the method of characteristics

N. D. Kopachevskii and A. N. Temnov — 67 — Free oscillations of an ideal stratified liquid in a vessel

V. Ya. Mitnitskii — 77 — The stability of magnetohydrodynamic tangential discontinuities

E. A. Gershbein and S. V. Peigin — 82 — A numerical solution of the three-dimensional mixing layer equation

Short Communications

V. V. Aleksandrov and G. L. Stenchikov — 87 — Numerical simulation of the climatic consequences of a nuclear war

V. L. Ven, P. I. Litvintsev and K. K. Frolov — 90 — Solving a set of linear inequalities by the method of least squares

Yu. V. Bulavskii — 93 — Minimizing the variance of the estimate by collisions in problems with alternating elements

N. S. Vasil'ev — 96 — An active method of searching for the global minimum of a concave function

N. N. Kuzyurin — 100 — The complexity of approximate algorithms for the problem of integer programming

E. S. Andreev, M. Yu. Kozmanov and E. B. Rachilov — 103 — Exact solutions of sets of radiation transfer equations with a discontinuity at the boundary of two media

Yu. I. Zhuravlev and I. M. Platonenko — 105 — An economic multiplication of Boolean equations

R. A. Denisova — 108 — One class of functions of k-valued logic

Translation of Number 2

V. A. Morozov — 110 — Stable numerical methods for solving simultaneous systems of linear algebraic equations

B. B. Pokhodzei — 114 — Beta- and gamma-methods of modelling binomial and Poisson distributions

A. G. Zarubin — 118 — On the rate of convergence of the Bubnov–Galerkin method for eigenvalue problems

VOL. 24 1984

A. A. TRET'YAKOV 123 Necessary and sufficient conditions for optimality of P-th order

L. I. MINCHENKO 128 Differential properties of the maximum function under connected constraints

N. N. KOZLOV 133 The method of virtual contacts

L. I. KAMYNIN and B. N. KHIMCHENKO 145 On local Lipschitz boundary estimates for solutions of 2nd-order parabolic equations with non-negative characteristic form

V. I. GRYN' 154 On iterative processes for problems of transport theory

A. YA. KAZAKOV 159 The inverse problem of linear radiation transport theory

G. V. AKKURATOV and V. I. DMITRIYEV 166 A method of calculating the field of steady-state elastic oscillations in a stratified medium

N. V. MUZYLYEV 176 The *a priori* monotonicity condition for the heat flux at a boundary

G. M. KOBEL'KOV 181 On one difference scheme for calculating non-stationary Navier–Stokes equations

Short Communications

A. A. ABRAMOV and S. KH. DZUMAGAZIEVA 188 The rate of convergence of an iteration method for solving equations containing monotonic operators

A. S. BARASHKOV 191 An inverse problem for the Helmholtz equation in a domain with unknown boundary

A. K. ZAKHAROV 195 A note on the algorithm for calculating a non-stationary light field from a narrow-beam source by the Monte Carlo method

O. G. FILATOV 197 Design of the inductor of Tokamak thermonuclear devices by the regularization method

A. A. MERZLYAKOV 199 A difference algorithm for solving the equations of a boundary layer

E. S. VENTSEL', V. G. KOBYLINSKII and A. M. LEVIN 202 Application of the regularization method for the numerical solution of the problem of the bending of thin elastic plates

VOL 24 198

VOL. 24, NO. 2 CONTENTS 1984

Translation of No. 3

A. A. ABRAMOV 1 Numerical solution of some algebraic problems arising in the theory of stability

N. M. NOVIKOVA 6 A stochastic quasi-gradient method of solving optimization problems in Hilbert space

YU. I. MOKIN and P. D. SHIRKOV 16 Functional properties of stable difference schemes

A. I. NESTERENKO and N. G. NESTERENKO 24 An auxiliary mesh method for solving numerically problems with moving phase boundaries

V. I. GRYN' 29 On majorant estimation for a one-dimensional linear hyperbolic equation

K. ZH. DAULETIYAROV 34 Study of the mesh method for the Bona–Smith and Burgers–Korteweg–De Vries equations

M. G. ALISHAEV and G. O. KHAZAMOV 44 The use of matrix pivotal condensation for problems of oil-field flooding

R. P. TARASOV and A. E. TEMKIN 51 Numerical analysis of the ray equations in a bent cylinder

V. N. KOTEROV 61 Calculation of the space–time distribution of charged particles in volume gas discharges

A. A. KOSTUZIK and A. N. RUMYNSKII 65 Radiative heat exchange in a shock layer when there is spatial gas flow around blunt bodies

NGO VAN LYOK, KHOAN KUOK ON and CHAN ZA LIK 70 Calculation of interrupted waves by the method of characteristics with a constant mesh

A. PODDAR — 74 Algorithms for computing estimates in the case of incomplete information

Short Communications

L. L. KOSACHEVSKAYA and I. E. SHPARLINSKII — 81 The rate of convergence of some iterational processes

L. K. MARTINSON — 85 Nonlinear effects during the evolution of thermal structures

S. A. GABOV and G. YU. MALYSHEVA — 89 The Cauchy problem for one class of the motions of a viscous stratified liquid

G. T. GOLOVIN — 92 Numerical solution of the problem of current amplification in an ion beam

Translation of No. 4

YU. L. GAPONENKO — 96 On the degree of decidability and the accuracy of the solution of an ill-posed problem for a fixed level of error

A. A. FONAREV — 101 The solution of a bifurcation equation with a simple eigenvalue

V. L. KREPS — 105 On quadratic forms non-negative over an octant

V. F. GAIDUK — 109 Some modifications of the shooting method for solving non-linear two-point boundary value problems

O. B. KAMAEVA — 116 Path estimation in weighted Monte Carlo methods

V. M. GOLOVIZNIN, M. A. RYAZANOV and O. S. SOROKOVIKOVA — 120 On a class of completely conservative difference schemes of magneto-hydrodynamics in mixed Euler-Lagrange variables

G. T. GOLOVIN — 130 Transport in the one-dimensional natural field of a density-homogeneous but velocity-inhomogeneous beam

M. YU. ZHUKOV — 138 A non-stationary model of isotachophoresis

S. A. ABRAMOV — 149 Methods of calculating the preconditions of programs

A. G. ITSKOV and N. I. KALYADIN — 157 On the completeness of the algebraic closure of the space of recognition operators with test support sets

S. A. YAKOVLEV — 161 On recognition by the method of localized functions

Short Communications

N. V. SHIROBOKOV — 170 A definition of stiff differential problems

YU. M. NECHEPURENKO — 172 Factorization of the elements of an inverse matrix

P. F. ZHUK — 175 Asymptotic rate of convergence of the method of steepest descent in eigenvalue problems

P. A. DOROFEYEV — 177 A multistep stochastic ε-subgradient method of minimizing a convex function

N. G. BANDURIN and A. P. NIKOLAYEV — 180 The solution of nonlinear problems

V. F. YEMETS — 183 Solution of an inverse scattering problem in the linearized formulation

VOL. 24 984

VOL. 24, NO. 3 CONTENTS 1984

Translation of Number 5

V. P. MAIER — 1 Pivotal-condensation algorithms for a $(2m + 1)$-diagonal matrix

A. P. DANILIN and V. P. TANANA — 5 The necessary and sufficient conditions for the approximations of linear ill-posed problems in a Hilbert space to converge

B. I. KVASOV — 9 Interpolation by means of discrete parabolic splines

M. K. KERIMOV and S. L. SKOROKHODOV — 15 Calculation of modified Bessel functions in the complex domain

V. G. ZHADAN — 25 On one class of iterational methods for solving problems of convex programming

E. O. Dzhetybayev and K. K. Sabel'fel'd — 32 The solution of a mixed problem for equations of the parabolic and hyperbolic type by the Monte Carlo method

V. B. Glasko, A. V. Zakharov, M. Ye. Il'in, Yu. A. Poveshchenko and A. N. Tikhonov — 38 On some problems of optimizing the quasi-uniform heating of bulky components

V. I. Gryn' — 43 Generalization of Pomraning boundary conditions to the P_N-approximation of the method of spherical harmonics for the transfer equation

D. Ya. Petrina — 53 Solution of a classical problem of electrostatics by a computational procedure

I. B. Petrov and A. S. Kholodov — 61 Numerical study of some dynamic problems of the mechanics of a deformable rigid body by the mesh-characteristic method

I. M. Israilov — 73 Effective expressions for evaluating estimates in a class of recognition algorithms

V. K. Leont'ev — 77 On the realizability of lengths in trajectory problems

Short Communications

M. A. Krasnosel'skii and A. V. Sobolev — 82 On *a posteriori* error estimates when seeking an eigenvector

A. I. Kosolap — 84 Decomposition in a non-linear programming problem with a non-convex constraint

V. A. Protopopov — 86 An algorithm for solving ordinary differential equations for controlling computers

S. A. Bespalova — 88 On a non-linear eigenvalue problem

I. L. Osipov — 92 Is the Laval nozzle shaping problem well-posed?

M. V. Lipavskii and A. I. Tolstykh — 95 The small parameter method for the numerical study of the flow of a stratified medium

M. Ya. Ivanov and V. V. Koretskii — 98 Calculation of viscous flows in the boundary layer approximation

Yu. A. Zuev and V. N. Trishin — 101 On the connection between linear inequalities and monotonic Boolean functions

N. N. Katerinochkina — 103 Some relations for subsets of layers of an n-dimensional k-valued lattice

M. M. Kovalev and P. Milanov — 106 Monotonic functions of many-valued logic and supermatroids

S. N. Greshnev — 109 The polyhedron of a problem on an m-vertex subgraph of a complete graph

Translation of Number 6

A. S. Poznyak and Ya. Z. Tsypkin — 112 Class-wise optimal algorithms for optimization in correlated-noise conditions

D. D. Frolkin — 123 The solution of some stochastic two-stage problems

V. A. Osipova, V. V. Podinovskii and N. P. Yashina — 128 A non-contradictory extension of preference relations in decision-making problems

M. V. Fedoryuk — 134 Asymptotic form of the solutions of ordinary differential equations with rotation points

A. A. Belolipetskii and A. M. Ter-Krikorov — 141 Fundamental solutions of the non-linear equation of heat conduction

G. I. Shishkin — 150 A method of improving the accuracy of the solution of difference schemes for parabolic equations with a small parameter in the highest derivative

G. N. Kuraev — 158 On the convergence of explicit schemes for Navier–Stokes equations

S. E. Krestnikov — 164 A new method of evaluating generalized multicentred one-electron integrals

S. A. Gabov and G. Yu. Malysheva — 170 On a spectral problem connected with the oscillations of a viscous stratified fluid

G. P. Voskresenskii — 174 A numerical method for calculating the supersonic flow past the wings of an aircraft

V. A. Kazakov — 183 On the construction of schemes of higher-order of accuracy in calculating flows of a viscous liquid using B-splines

A. I. Zenkin and V. K. Leont'ev — 189 On a non-classical recognition problem

VOL
24
198

Short Communications

I. P. RYAZANTSEVA 194 Variational inequalities with monotonic operators on sets which are specified approximately

N. A. SIMONOV 197 A modification of the random walk over spheres algorithm which is convenient for practical application

L. V. ARDOVA and G. A. KAMENSKII 199 Application of the local-variation method to the solution of variational problems with a deviating argument

S. S. KOZLOV and T. V. SAZONOVA 202 A dynamic minimization method

P. A. VOINOVICH 204 A marching method of calculating the flows of a viscous gas in channels

M. S. PEKKER and V. N. KHUDIK 206 Conservative difference schemes for the Fokker–Planck equation

VOL. 24, NO. 4 CONTENTS 1984

Translation of Number 7

A. YU. LUCHKA, O. E. NOSHCHENKO and N. I. TUKALEVSKAYA 1 The variational gradient method

A. M. BALK 6 Computer realization of the method of Newton diagrams

A. A. TRET'YAKOV 14 Two schemes for a non-linear method of optimization in extremal problems

V. N. NEFEDOV 19 On the approximation of a Pareto set

A. I. ZADORIN 28 Numerical solution of the third boundary value problem for an equation with a small parameter

S. I. SERDYUKOVA 33 Asymptotic estimates of Green's function and the "difference step" in the case of Lipschitz-continuous coefficients

V. V. BULAN, G. T. GOLOVIN and YU. I. MOKIN 42 Mathematical models of the quasistationary mode of magnetic self-insulation in vacuum transport lines

N. F. TRUSKOVA 49 Sturm solutions of the two-centre problem of quantum mechanics

G. V. ZHDANOVA 57 Scattering of two-dimensional elastic waves by a cavity with a free boundary

V. F. BAKLANOVSKAYA, A. S. BLATOV, K. ZH. DAULETNYAROV, S. KH. DZHUMGAZIEVA, A. T. KONDRIN and I. I. CHECHEL' 65 On numerical modelling of long surface and internal waves in a closed and slowly revolving tank

I. V. ISAYEV 73 An efficient method for synthesizing correct recognition algorithms

Short Communications

I. V. KOCHIKOV, A. N. MATVIENKO and A. G. YAGOLA 78 A generalized discrepancy principle for solving incompatible equations

YU. E. NESTEROV 80 One class of methods of unconditional minimization of a convex function, having a high rate of convergence

V. A. KOZLOV, I. M. NEFEDOV and I. A. SHERESHEVSKII 82 A method of modelling exponential distributions transport theory

A. D. KLIMOV, L. G. STRAKHOVSKAYA and R. P. FEDORENKO 85 A numerical method of calculating the neutron field in a three-dimensional rectangular cell of a reactor

V. P. BELICHENKO, G. G. GOSHIN and G. G. KRAVCHENKO 89 Diffraction of the field of an electric dipole on a spirally conducting finite cone

ZH. P. GIRO and R. KH. ZEYTOUNIAN 92 The setting in motion of a viscous liquid inside a two-dimensional cavity

S. A. ABRAMOV 95 The consequences (unconnected with a change of state) of executing programs

VOL. 24 1984

Translation of Number 8

A. M. LEVIN 98 Regularization of the calculation of the lower bounds of functionals

F. V. SRUMOVA 102 Energy functional for the abstract Cauchy problem

S. A. GLADYSHEV and G. N. MIL'SHTEIN 106 The Runge–Kutta method for evaluating the Wiener integrals of exponential type functionals

M. K. KERIMOV and S. L. SKOROKHODOV 115 Calculation of the complex zeros of the modified Bessel function of the second kind and its derivatives

V. G. ZHADAN 124 On some estimates of the penalty coefficient in methods of exact penalty functions

I. B. PETROV and A. S. KHOLODOV 128 Regularization of discontinuous numerical solutions of equations of hyperbolic type

A. S. MAKARENKO 139 On computation of modes with peaking in problems of heat conduction

P. N. VABISHCHEVICH 143 Numerical solution of boundary value problems for fourth-order elliptic equations

O. M. BELOTSERKOVSKII, S. O. BELOTSERKOVSKII and V. A. GUSHCHIN 150 Numerical modelling of the non-stationary periodic flow of a viscous fluid in the wake behind a cylinder

A. N. IVANOVA and N. E. MAGANOVA 155 On the non-local nature of the behaviour of dissipative structures

V. V. ZAIKA and S. M. SHVARTIN 163 On the cycles generated by an arbitrary set of matrix elements

B. YA. KOVALERCHUK and V. V. LAVKOV 170 Retrieval of the maximum upper zero for minimizing the number of attributes in regression analysis

D. N. GAINANOV 176 On one criterion of the optimality of an algorithm for evaluating monotonic Boolean functions

Short Communications

A. B. BAKUSHINSKII 181 Remarks on choosing a regularization parameter using the quasi-optimality and ratio criterion

I. A. GLINKIN and A. G. SUKHAREV 182 Evaluation of multidimensional integrals using Peano-curve type involutions

G. V. TOMSKII 185 A method for successive approximations of Bellman's function

M. F. SUKHININ 187 Two versions of the gradient method

A. I. SHERSTYUK and I. N. YAKUSHINA 188 Asymptotic expansions of the eigenfunctions of a discrete spectrum of the problem of two Coulomb centres

ZH. P. GIRO and R. K. ZEYTOUNIAN 191 The behaviour of a medium with weak diffusion for large values of time

E. M. PODGAETSKII 193 A double-sided estimate of the solution of a non-linear integral equation

A. P. TOROKHTII 194 Regularized methods of restoring quadratures optimum in classes of grids

VOL. 24, NO. 5 CONTENTS 1984

Translation of Number 9

A. A. LIGUN and A. A. SHUMEIKO 1 On optimal choice of nodes when approximating functions by interpolation splines

G. A. MIKHAILOV 8 Minimax theory of weighted Monte Carlo methods

G. M. AGAYAN, A. A. RYUTIN and A. N. TIKHONOV 14 The problem of linear programming with approximate data

P. N. VABISHCHEVICH 19 Numerical solution of variational elliptic inequalities of fourth order

V. F. Butuzov and A. G. Nikitin — 25 Singularly disturbed elliptic boundary value problem in a rectangle in the critical case

L. I. Kamynin — 32 The uniqueness of the solution of the first boundary value problem in an unbounded domain for a second-order parabolic equation

A. S. Kholodov — 41 The construction of difference schemes with positive approximation for equations of parabolic type

Ta Van Dinh — 48 On the asymptotic error expansions to finite difference methods

P. D. Shirkov — 56 Approximate and numerical methods for calculating the composition of an equilibrium plasma

G. I. Veselov and V. M. Temnov — 63 The applicability of the reduction method when solving algebraic systems in certain diffraction problems

I. V. Isaev — 70 Synthesis of recognition and classification algorithms by the covering method

Short Communications

S. M. Bersenev — 76 On computational schemes of the regularization method

I. E. Shparlinskii — 79 On a multiplicative generator of pseudorandom numbers

A. F. Shapkin — 81 A stochastic method for solving a boundary value problem

K. A. Nersisyan, A. I. Panarin and V. V. Shchennikov — 84 A quasimonotonic scheme for a quasilinear equation

Yu I. Mokin — 87 Mathematical models of the pronounced skin effect

A. S. Voinovskii, V. I. Kireev, Yu. M. Lipnitskii and A. V. Rodionov — 92 Calculation of chemically non-equilibrium jets of gas flowing into a vacuum

N. N. Metel'skii — 96 Methods of local optimization for the problem of permutating bipartite graphs

Translation of Number 10

Il. V. Makrelov and Khr. Semerdzhiev — 99 Methods of finding simultaneously all the roots of algebraic, trigonometric, and exponential equations

V. I. Gryn' — 106 Two-step iterative regularization methods

M. I. Khaikin — 117 Regularization of ill-posed problems of solving one-dimensional integral equations in convolutions

I. E. Dneprovskii — 124 On a method of solving problems of best discrete approximation

M. K. Kerimov and S. L. Skorokhodov — 131 Evaluation of complex zeros of Bessel functions $J_\nu(z)$ and $I_\nu(z)$ and their derivatives

A. S. Marchenko and V. A. Ogorodnikov — 141 The modelling of very long stationary Gaussian sequences with an arbitrary correlation function

N. N. Kanaeva and O. A. Shcherbina — 145 On the efficiency of a modified local algorithm for solving discrete optimization problems

A. A. Kronberg — 153 Algorithms for the statistical modelling of the solution of elliptic-type boundary value problems

N. Yu. Bakaev — 158 The numerical solution of elliptic differential equations

A. K. Shatov — 165 Diffraction of plane waves at a horizontal half-plane in a compressible stratified fluid

G. S. Khakimzyanov and I. K. Yaushev — 170 Calculation of the pressure in stationary problems of ideal fluid dynamics

O. G. Alekseev and V. F. Grigor'ev — 175 Some algorithms for solving the covering problem, and their experimental study on a computer

VOL. 24 1984

Short Communications

V. N. BABENKO 179 The convergency of the Kaczmarz projection algorithm

V. S. ANTYUFEEV 182 A method of calculating the correlation characteristics of the brightness field in a stochastic medium by the Monte Carlo method

P. D. SHIRKOV 184 The accuracy of monotonic schemes for rigid systems of differential equations

V. V. DYAKIN and B. I. REZER 188 Approximation of atomic wave functions and potentials by functions of Gaussian type

A. V. TUZIKOV 191 A bicriterion problem of the scheduling theory taking the variation of servicing time into account

A. A. SAFARYAN 194 The solution of systems of Boolean equations arising when constructing tests and systems of Nelson's type

VOL. 24, NO. 6 CONTENTS 1984

Translation of Number 11

V. B. GLASKO and YU. A. KRIKSIN 1 On the quasi-optimality principle for ill-posed problems in Hilbert space

V. I. GRYN' 8 Two-step iterative regularization methods for solving ill-posed problems with a selfconjugate non-negative operator

A. A. VATOLIN 18 On the problems of linear programming with integral coefficients

A. T. LUK'YANOV and S. YA. SEROVAISKII 23 The method of successive approximations in a problem of the optimal control of one non-linear parabolic system

I. P. BOGLAEV 30 Approximate solution of a non-linear boundary value problem with a small parameter for the highest-order differential

V. F. BAKLANOVSKAYA 36 Investigation of the method of nets for two-dimensional equations of the Navier–Stokes and Euler type with non-negative viscosity—I

G. L. STENCHIKOV 48 Anomalous thermal waves in a plasma

M. P. GALANIN and N. A. TIKHONOV 55 Determination of the parameters of a model for the motion of salts

E. I. BYKOVA 60 Estimates of the rate of convergence of projection-difference schemes for parabolic equations in a domain with a small opening

A. A. IVANOV, A. V. IVANOV and I. A. FARADZHEV 67 Distance-transitive graphs of valency 5, 6 and 7

V. L. MATROSOV 76 Capacity of algebraic extensions of a model of estimate-computing algorithms

Short Communications

KH. D. IKRAMOV 84 On multiplication of a perforated matrix by a vector

V. A. PUPKOV 86 Some sufficient conditions for the non-degeneracy of matrices

S. F. GILYAZOV and V. A. MOROZOV 89 Optimal regularization of ill-posed normally solvable operator equations

E. I. SAKALAUSKAS 93 Galerkin–Tikhonov regularization in the numerical differentiation problem

I. O. YAROSHCHUK 97 On numerical modelling of one-dimensional stochastic wave problems

YU. G. GRIGOR'YAN 100 Existence and representation of natural arithmetic graphs

YU. V. ALEKSANDROV 103 On a problem of non-linear programming for unsmooth target functions

VOL
24
198

Translation of Number 12

A. V. LOTOV — 104 An estimate of the stability and the condition number of a set of solutions for a system of linear inequalities

V. N. KUBLANOVSKAYA — 112 A general approach to reducing a regular linear pencil to a pencil of quasitriangular form

I. V. MAYUROVA and R. G. STRONGIN — 121 Minimization of a multi-extremum function with a discontinuity

A. A. SHANANIN — 127 Investigation of a class of production functions arising in the macro description of economic systems

V. D. LISEIKIN — 135 On the numerical solution of a singularly-perturbed equation with a turning point

YU. N. AKKURATOV and V. N. MIKHAILOV — 140 The solution of non-linear stationary problems of thermal conduction with boundary conditions of the I–IV kind

V. F. BAKLANOVSKAYA — 145 Investigation of the method of nets for two-dimensional equations of the Navier–Stokes type with non-negative viscosity—II

V. YU. GUSEV, M. YU. KOZMANOV and E. B. RACHILOV — 156 A method of solving implicit difference equations approximating systems of radiation transport and diffusion equations

S. A. GABOV, G. YU. MALYSHEVA, A. G. SVESHNIKOV and A. K. SHATOV — 162 On some equations arising in the dynamics of a rotating stratified and compressible fluid

A. G. KUZ'MIN — 171 The existence of a solution of the direct Lavalle nozzle problem in variations

A. R. ASHUROV and K. V. RUDAKOV — 175 Estimate-computing algorithms for the object recognition problem with continuous initial information

V. L. MATROSOV — 182 Lower bounds of the capacity of L-dimensional algebras of estimate-computing algorithms

Short Communications

YU. A. KRIKSIN — 189 On the solution of linear ill-posed problems by the method of local discrepancies

E. V. ZIMA — 193 Automatic construction of systems of recurrence relations

A. V. KARZANOV — 197 On closed sets of a directed graph

A. A. VATOLIN — 200 Approximation of non-eigen problems of linear programming using the Euclidean norm criterion
